## EXTENSION OF UNFAIR CONTRACT TERMS REGULATION TO SMALL BUSINESSES

The Shopping Centre Council has lodged a [submission](#) on the Federal Government's [Consultation Paper](#) on extending unfair contract terms regulation (currently confined to consumers) to small businesses. While we remain firmly of the view that this would be a wrong step for Australia (and will put Australia at odds with other major western countries), we accept this is an election commitment by the Government and will be implemented. We have therefore recommended specific changes to the UCT provisions if they are to be extended to small business. We have also argued there needs to be a rigorous definition of a 'small business' and have proposed this be consistent with the definition in the *Fair Work Act* i.e. a business that employs fewer than 15 employees.

We have also argued that retail leases (contracts) which are already regulated by state and territory retail tenancy legislation should be exempted from the new law. This follows assurances given by the Minister for Small Business, Bruce Billson MP, that he does not want to create a "forum shopping extravaganza" and that, where satisfied there is "enforceable equivalence" for small businesses through other mechanisms, "we won't go at these transactions twice". Our submission argues in detail that there is already in existence an extensive body of legislated rules, in retail tenancy legislation, about 'fair behaviour' by retail property owners when dealing with small retailers. These rules, which have been formulated in consultation with retailers and landlords, are industry specific and do not rely on subjective interpretation by a judge about what is 'fair' or 'unfair'. If a lease term fails to meet these minimum standards then it is void. Without an exemption for regulated retail leases, the proposed extension of the UCT provisions will mean 'double regulation' of those leases and this runs contrary to the Government's commitment to remove unnecessary business red tape.
